

AMENDMENTS TO THE CLAIMS:

Please cancel claims 127-133, 135 and 137-139. This listing of claims replaces all prior versions, and listings of claims, in the application.

LISTING OF CLAIMS:

Claims 1-73 (Cancelled).

74. (Previously presented) An array of nucleic acid probes, wherein each probe comprises:

a single-stranded first nucleic acid of about 15-25 nucleotides in length;

a longer single-stranded second nucleic acid of about 20-30 nucleotides in length, comprising a nucleotide sequence complementary to the first nucleic acid and a random terminal nucleotide sequence of between 3-10 nucleotides in length; and

an oligonucleotide of 4-20 nucleotides in length, comprising a random nucleotide sequence, wherein:

the first nucleic acid is hybridized to the second nucleic acid to form a hybrid having a double-stranded portion and a single-stranded portion comprising the random terminal nucleotide sequence of between 3-10 nucleotides in length; and

the oligonucleotide is ligated to the random nucleotide sequence of the second nucleic acid.

75. (Previously presented) The array of claim 74, wherein the nucleic acids in the array are fixed to a solid support selected from the group consisting of plastics, ceramics, metals, resins, gels, membranes, and chips.

76. (Previously presented) The array of claim 75, wherein the solid support is a two-dimensional or a three-dimensional matrix with multiple probe binding sites.

Claims 77-91 (Cancelled).

92. (Previously presented) The array of claim 74, wherein the probes are labelled with a detectable label.

93. (Previously presented) The array of claim 92, wherein the detectable label is selected from the group consisting of radioisotope, a stable isotope, an enzyme, an antibody, a fluorescent chemical, a luminescent chemical, a chromatic chemical, and a metal.

94. (Previously presented) The array of claim 74, wherein the nucleic acids are DNA, RNA, Protein Nucleic Acid (PNA), or a combination thereof.

Claims 95-122 are cancelled.

123. (Previously presented) The array of claim 74, wherein the probes are fixed to a solid support by conjugating to a coupling agent selected from the group consisting of antibody/antigen, biotin/streptavidin, *Staphylococcus aureus* protein A/IgG antibody F_c fragment, nucleic acid/nucleic acid binding protein, and streptavidin/protein A chimeras.

124. (Previously presented) The array of claim 74, wherein the random region is of length R and the array comprises about 4^R different nucleic acid probes.

Claims 125 and 126 (Cancelled).

Claims 127-135 (Cancelled).

136. (Previously presented) The array of claim 74, wherein the double-stranded portion of each probe includes an enzyme recognition site.

Claims 137-139 (Cancelled).
